

## Window Films for Existing Glass

If you have a problem with existing glass we can solve it

Over 30 years of solving glazing problems

*Window film provides a solution to the problems caused by existing glass. The very latest technology allows you to save energy and helps you and the businesses reduce your carbon footprint.*

### **SOLAR CONTROL FILMS**

Reject up to 80% of the sun's heat keeping your environment cooler. Air conditioning units need not work as hard to keep you cool, reduce your energy costs, save money and the environment too.

### **ANTI GLARE FILMS**

Reject up to 94% of the sun's annoying glare. The ideal solution for reducing glare on computers and workstations.

### **SAFETY & SECURITY FILMS**

Upgrade existing glass to current European and British Standards. The ideal solution wherever there is a risk from the dangers of broken or flying glass.

### **ANTI BOMB BLAST FILMS**

High performance security films for use where there is a high risk from terrorist attack, riot or extreme weather.

### **AUTO TINT FILMS**

Enhance your car's appearance while keeping the interior cool and free from glare. Improves privacy and security.

- Solar Control
- Glare Control
- Safety & Security
- Bomb Blast
- Anti Fade
- Privacy
- Energy Saving
- Manifestation
- Graphics

### **CONSERVATORY FILMS**

If your conservatory gets too hot or suffers from extreme glare, specialist films are available for use in the home or commercially. All films help prevent fading of furniture and fittings by reducing ultra violet transmission to less than 1%.

### **PRIVACY FILMS**

You can see out when others cannot see in. The ideal solution when you want to keep prying eyes out. Frosted films are used when total privacy is required day or night.

### **GRAPHICS & MANIFESTATION FILM**

Used to help avoid collision with existing glass which is now a legal requirement. Manifestation dots, squares or bands are used to identify glass. Custom designs can be created using your own corporate identity.

### **ENERGY SAVING FILMS**

Specialist energy saving films reduce heat loss by up to 25%. They reduce your energy costs and help save the environment.
